ABOUT ME

Full-Stack Developer with 1+ years of experience developing web applications using Java (Spring Boot) and React. Experienced in designing REST APIs, working with relational and NoSQL databases such as MySQL and Couchbase, and contributing to CI/CD pipelines using Jenkins and Docker. Comfortable working in Agile/Scrum teams using Jira and Confluence.

WORK EXPERIENCE

Betfair Romania Development – Cluj-Napoca, Romania

Software Engineer (Intern)

[27/01/2025 – 30/04/2026]

Developed and maintained backend services using Java and Spring Boot
Built frontend components using React
Designed and consumed REST APIs
Worked with MySQL and Couchbase (NoSQL) databases for data persistence and optimization
Contributed to CI/CD pipelines using Jenkins and Docker
Collaborated in Agile/Scrum environment using Jira and Confluence for task tracking and documentation
Participated in code reviews and improved code quality

EDUCATION AND TRAINING

Bachelor's Degree in Automation and Applied Informatics

UMFST Targu Mures [15/09/2023 – Current]

Country: Romania | **Website:** https://umfst.ro/

SKILLS

Backend

Java (computer programming) / Rest APIS / Spring Boot

Frontend

JavaScript Framework / React.js / Web Technologies: HTML5, CSS3

Databases

MySQL / NoSQL(Couchbase)

Devops & CI/CD

Jenkins / Docker / CI/CD Pipelines

Tools & Platforms

Git / GitHub / GitLab / Jira / Confluence

Methodologies

Agile development / Scrum

LANGUAGE SKILLS

Mother tongue(s): Romanian

Other language(s):

English

LISTENING B1 **READING** B1 **WRITING** B1

SPOKEN PRODUCTION B1 **SPOKEN INTERACTION** B1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

PROJECTS

Digital Banking Web Application – Full-Stack Project Full-stack web application for managing banking operations and user accounts.

- Developed REST APIs for user management, transactions, and payments
- Implemented features such as money transfers, card operations, and currency exchange
- Built responsive frontend using React with real-time data communication via Axios
- Integrated MySQL database for persistent data storage
- Designed application structure for scalability and maintainability

Technologies: Java, Spring Boot, React (Vite), Axios, MySQL, REST APIs

Read Tracking Service - Backend Project Backend service for managing and tracking user message interactions.

- Developed REST API for sending and managing user messages
- Implemented message lifecycle tracking (delivered, read, interacted)
- Designed layered architecture (Controller, Service, Repository)
- Added functionality for per-user message visibility control
- Integrated automated reporting system to Slack using scheduled jobs

Technologies: Java, Spring Boot, Spring Data JPA, MySQL, REST APIs, Scheduler
